

eni i-Sint professional

AGIP SINT PROFESSIONAL is a very high performance fully synthetic lubricant of the latest generation to meet the requirements of the newest automobile gasoline engines. It is specially indicated for high output engines and vehicles operating under severe temperature and use conditions.

CHARACTERISTICS (TYPICAL FIGURES)

AGIP SINT PROFESSIONAL

SAE Grade	5W-40	
Viscosity at 100°C	mml/s	13,6
Viscosity at 40°C	mml/s	80
Viscosity at -30°C	mPa.s	6300
Viscosity Index	-	174
Flash Point	°C	240
Pour Point	°C	-36
Mass Density at 15°C	kg/l	0.852

PROPERTIES AND PERFORMANCE

- Synthetic base stocks and additives of a new technology ensure that SINT PROFESSIONAL maintains ideal viscosity under a wide range of conditions.
- Thanks to its viscosity grade, AGIP SINT PROFESSIONAL guarantees a quick oil circulation in all moving parts at the engine start independently from external temperature, even in extreme conditions.
- This product allows the engine to be properly lubricated either in cold start at extremely low temperatures or in case of motorway driving with high temperature.
- The presence of low-volatility components with high thermal stability reduces oil consumption due to volatility.
- The lubricant forms an oily film which adheres tenaciously to metal surfaces even when the engine has been standing for some time, thus ensuring easy starting and greatly reduced wear even under high load conditions.
- The lubricant maintains its viscosity and lubricity even under severe driving conditions. With its unique antiwear properties a long life for all moving parts is ensured that substantially reduces the need for engine servicing and overhauls.
- Both road and laboratory tests show that this lubricant provides the ideal combination of viscosity, lubricity, volatility and detergency to ensure a maximum protection of the engine, while friction and oil loss are kept to a minimum.
- AGIP SINT PROFESSIONAL is compatible with exhaust catalytic devices, and with all the rubber seals used in the automotive field. It can also be mixed with all marketed lubricants which comply with international automotive specifications.
- AGIP SINT PROFESSIONAL is recyclable and like all oils when changed must always be brought back to an authorised collector for recuperation.

SPECIFICATIONS

AGIP SINT PROFESSIONAL is officially approved or meets the requirements of the following specifications:

- API SM/CF; ACEA A3/B3, A3/B4
- MB 229.3
- Maserati
- BMW LongLife (01)
- Porsche
- GM LL-B-025
- VW 502.00 + 505.00
