

AGIP BLASIA

The AGIP BLASIA series has been developed to meet the widest range of requirements of EP (Extreme Pressure) lubrication, such as, for instance, gears operating under severe duty (ISO-L-CKD classification). The oils are formulated from paraffinic base stocks and additives such as sulphur compounds (which ensure good high-speed and shock-load performance) and phosphorus compounds (for low-speed and high-load performance).

They thus satisfy the widest range of operational requirements.

CHARACTERISTICS (TYPICAL FIGURES)

| AGIP BLASIA | | 68 | 100 | 150 | 220 | 320 | 460 | 680 |
|----------------------|--------------------|-------|-------|-------|-------|-------|-------|-------|
| Viscosity at 40°C | mm ² /s | 64 | 100 | 141 | 220 | 300 | 460 | 627 |
| Viscosity at 100°C | mm ² /s | 8,2 | 11,8 | 13,9 | 18,7 | 23,0 | 30,9 | 35,4 |
| Viscosity Index | - | 95 | 95 | 95 | 95 | 95 | 95 | 90 |
| Flash Point COC | °C | 225 | 230 | 235 | 240 | 240 | 245 | 250 |
| Pour Point | °C | -27 | -24 | -22 | -20 | -18 | -15 | -9 |
| Mass density at 15°C | kg/l | 0,885 | 0,890 | 0,895 | 0,895 | 0,900 | 0,905 | 0,915 |

PROPERTIES AND PERFORMANCE

- AGIP BLASIA oils have very good antiwear and EP properties as demonstrated by the following tests:
 - FZG: pass the 12th stage level;
 - TIMKEN: OK LOAD 60 lbs;
 - 4 BALL EP:* 110 kg last nonseizure load;
 - * 280 kg weld load.
- The oils also possess the following properties:
 - thermal and oxidation stability, permitting continuous use at operating temperatures as high as 100 °C
 - non-corrosiveness towards materials employed for the construction of machinery and especially those used for gaskets and seals, as well as metals such as steel, cast iron, copper and bronze;
 - demulsibility: AGIP BLASIA oils separate rapidly from water and thus ensure perfect lubrication even in applications where water contamination is possible, as in steelmaking plants, for instance;
 - rust protection properties: These oils effectively help protect and conserve lubricated parts even in damp conditions;
 - toxicity: the products are non-toxic since they contain no lead compounds; they can thus be used in oil-mist lubrication systems.

APPLICATIONS

AGIP BLASIA oils are recommended for splash or circulation lubrication of all types of enclosed gears, especially where operating conditions involve heavy loads, high speeds and high relative sliding velocities, at elevated ambient and operating temperatures. The oils can also be used to lubricate other heavily-loaded parts and components such as couplings, transmission screws and low speed plain bearings. As indicated, they can be used, too, in oil-mist lubrication systems.

AGIP BLASIA

SPECIFICATIONS

AGIP BLASIA oils meet the requirements of the following specifications:

- ISO-L-CKD
- ANSI/AGMA 9005-D94 (AGMA 2EP, 3EP, 4EP, 5EP, 6EP, 7EP, 8EP)
- ASLE EP
- DIN 51517 teil 3 CLP
- U.S. STEEL 224
- DAVID BROWN S1.53.101(5E)
- ISO 12925-1

AGIP BLASIA products have been approved by the CINCINNATI MILACRON (P-63 ISO 68, P-77 ISO 150, P-74 ISO 220, P-35 ISO 460).

AGIP BLASIA 150, 220, 320, 460, 680 are approved by Danieli according to Standard 0.000.001 specification
